Brand Guidelines:

AI in the Workplace

1. Brand Identity & Vision

The **AI in the Workplace** brand represents the seamless integration of human capital and artificial intelligence. The logo perfectly encapsulates this through the fusion of a human profile, technological circuitry, and a gear representing industry and teamwork.

2. Colour Palette

The colour palette balances the trust and professionalism of corporate consulting with the vibrant, forward-thinking energy of modern technology.

Primary Colours These colours form the core identity of the brand and should be used for main headings, logos, and primary backgrounds.

- 🟦 **Deep Trust Navy** (Used for main text "AI IN THE WORKPLACE")
  - **HEX:** `#0A2540`
  - **CMYK:** 95, 75, 40, 50
  - **RGB:** 10, 37, 64
- 🔲 **Consulting Grey** (Used for subtext "CONSULTING • TRAINING • INTEGRATION")
  - **HEX:** `#7A7D81`
  - **CMYK:** 55, 45, 45, 10
  - **RGB:** 122, 125, 129

Gradient & Accent Colours Used within the logo mark and for digital assets, buttons, and call-out boxes. The gradient should flow from the vibrant cyan at the top to the deep violet at the bottom.

- 🩵 **Tech Cyan** (Top of the circuit head)
  - **HEX:** `#00A8E8`
  - **CMYK:** 75, 15, 0, 0
  - **RGB:** 0, 168, 232
- 💜 **Innovation Violet** (Bottom of the circuit head & gear)
  - **HEX:** `#5E2CA5`
  - **CMYK:** 75, 90, 0, 0
  - **RGB:** 94, 44, 165

3. Typography

To maintain a modern, clean, and highly readable aesthetic across all consulting and training materials, we recommend the following Google Fonts (which are free for commercial use).

Headings (H1, H2)

- **Font Family: Montserrat** (Bold or ExtraBold)
- **Usage:** Used for major document titles, website hero banners, and presentation headers. It mirrors the bold, structured sans-serif used in "AI IN THE WORKPLACE".

- **Case:** ALL CAPS for primary titles, Title Case for secondary headings.

Subheadings (H3, H4)

- **Font Family: Montserrat** (Medium or SemiBold)
- **Usage:** Used for section breaks, sub-titles, and call-to-action buttons.

Body Text

- **Font Family: Open Sans** (Regular)
- **Usage:** Used for all standard paragraph text, training manuals, and email communications. It is highly legible and pairs perfectly with Montserrat.

4. Iconography & Glyph System

When creating additional materials (presentations, workbooks, or website features), icons should follow the established design language of the logo.

- **Style:** Line-art or flat vectors with generous negative space.
- **Motifs:** * *Human-Centric:* Abstract figures, silhouettes, hands (to represent the HR and human element).
    - *Tech-Centric:* Circuit pathways, nodes, microchips, data points (to represent AI).
    - *Process-Centric:* Gears, cogs, arrows, interconnected circles (to represent integration and training).
- **Application:** Icons should predominantly be styled in **Deep Trust Navy** for formal documents, or utilise the **Cyan-to-Violet gradient** for digital applications to maintain brand consistency.

5. Usage Guidelines

To protect the integrity of the brand, please adhere to the following rules when placing the logo on any collateral.

Clear Space Always maintain a minimum breathing room around the logo to ensure maximum impact. The clear space should be equal to the height of the letter "A" in "AI IN THE WORKPLACE" on all four sides of the logo.

Minimum Size

- **Print:** The logo should never be reproduced smaller than 30mm in width to ensure the small text ("CONSULTING • TRAINING...") remains legible.
- **Digital:** The logo should not be displayed smaller than 150px in width.

Improper Usage

- **Do not** distort, stretch, or squash the logo. Always scale it proportionally.
- **Do not** alter the colours of the logo or use unauthorised gradients.
- **Do not** place the full-colour logo on a busy photographic background or a dark background that obscures the navy text.
- *Note for Dark Backgrounds:* If placing on a dark background, a completely reversed white version of the logo should be utilised.
